# Animo OptiVend 5

The new OptiVend instant tea machine meets the needs of the modern tea lover perfectly. A single push of the button and a delicious cup of hot tea is ready to enjoy in moments. The excellent price/ quality ratio of the OptiVend range makes the machines exceptionally interesting for organisations that demand a great deal in terms of flavour, choice and convenience, but also work within a tight budget.

## Coffee and tea varieties

With five containers for instant ingredients this machine offers many tea varieties. Besides tea you can of course also choose for a cup of coffee. Fresh cardamom or black tea, coffee, with or without milk and sugar. A cappuccino with a thick cream layer. You can prepare almost any hot drink quickly and easily with the new OptiVend machine.

## Stylish stainless steel

The machine is designed as compactly as possible and produced in stylish stainless steel. The OptiVend 5 is fitted with a design door with a beautiful graphic display. In short, an OptiVend machine can be placed in any office, breakfast area or staff canteen.

## Easy to operate

The OptiVend 5 is easy to install. You have no less than ten keys to set your favourite drinks. Thanks to its large canister, you don't have to fill the machine very often. Also handy: your OptiVend is easy to keep clean.

## Convenience is paramount

Animo has developed the OptiVend machines for optimum dispensing convenience. This is why the machine has an extra-large capacity. This makes it possible to dispense a large quantity of cups without the machine switching to its warm-up setting. The new OptiVend 5 has a capacity of at least 360 cups per hour.
